

# RNA Express

Fast, Expert-Reviewed Bulk and Single Cell RNA-Seq Analysis

Publication-ready differential expression results in 5–7 business days for a fixed cost.

## AT A GLANCE

RNA Express is a standardized RNA-seq analysis service for single-factor experimental designs.

- **\$2500 for up to 64 samples for bulk RNA**
- 5–7 business day turnaround
- Interactive report
- Downloadable DE & GSEA tables
- 2-hour expert consultation
- Upgrade path available

## Cost Justification:

Most teams face one of three options:

- Hire additional internal staff
- Accept generic fixed CRO reports
- Attempt DIY or AI-driven analysis

RNAseq Express provides:

- Senior-level statistical oversight
- Reproducible, documented workflows
- Faster time to insight
- No permanent headcount
- Protection for your internal team's time

Diamond Age Data Science is an integrated bioinformatics and computational biology partner for life science companies. We help teams make confident decisions that advance scientific programs. Our highly-regarded scientists address complex biological questions with urgency, adaptability, and scientific rigor.

## WHAT YOU GET

- **Standard RNA-Seq outputs:** Sample level QC metrics, normalization, differential expression, and gene set enrichment. Cell clustering and type annotation for single cell.
- **Expert Consultation:** Live video initial consultation and review of results. One of our transcriptional profiling specialists will go over the results, answer questions, and suggest next steps.
- **Interactive Report & Data Files:** Report with interactive tables and exportable DE and GSEA results.

## WHY IT MATTERS

- **Human led and reviewed:** senior scientists manually review the statistical model, QC, and results to avoid rookie mistakes or AI-driven errors.
- **Statistically sound analysis:** appropriate modeling and QC reduce false positives and protect subtle biological signals.
- **Biologically relevant interpretation:** enrichment and visualization are aligned to your experimental design and scientific question.
- **Reproducible outputs:** documented workflows and interactive reports support publication and review.

## COMMERCIAL ADVANTAGES

1

### Fixed Cost

Transparent, predictable pricing.

2

### Faster Outcomes

Insights delivered in 5–7 business days.

3

### No Fixed Headcount

Access senior RNA-seq expertise without hiring.

4

### Expert Oversight

Fully reviewed by experienced analysts.

5

### Instant Scale

Extend to deeper modeling when data demands it.
